The Income America 5ForLife advantage

With this investment option, you'll benefit from:

- Growth potential
- Guaranteed income for life
- Simplicity
- Control and flexibility
- Protection for you and your spouse

The market value of this investment option is never guaranteed and fluctuates based on investment performance. To receive the guaranteed income, you must stay invested in Income America 5ForLife. If you withdraw more than the guaranteed income in any year, your income base and future guaranteed income amount will decrease. Depending on the age of the participant's spouse at the income election date, a joint life option may be available

Income America 5ForLife in action

This chart is for illustration purposes only and shows the general principles of Income America 5ForLife, assumes a series of hypothetical annualized portfolio returns that illustrate both potential growth and the potential volatility of the market, no additional contributions after retirement and no post-retirement withdrawals that exceed the 5% guaranteed lifetime income payments. In this example, after age 65, no additional contributions or withdrawals were made, and no additional annual step-ups were applied since there was a declining investment balance. The graph above does not depict the actual performance of the investment and does not reflect fees. It is not an indication or guarantee of future performance or results, which may be lower or higher than those shown. Share prices and returns will vary, and investors may lose money. The participant's income base is never available for withdrawal but is only used for calculating income. It may be adjusted based on contributions to and/or withdrawals from the investment. While participants can withdraw the market value of the account at any time without any fees or penalties, doing so will cause them to lose the income guarantee. Participants will be able to elect to receive income any time after age 65. If they withdraw more than the guaranteed annual income in any year, the income base and future guaranteed annual income will decrease. However, if their required minimum distribution exceeds the guaranteed income amount, their income base will not be affected and the payments will not be lowered. Note that the timing of required minimum distributions taken from this investment option could adversely affect both your income base and your guaranteed income amount in certain situations. Please contact your plan representative for more details.
