Learn for Organizations & Skills First Initiatives
Microsoft*

Agenda

- **Program Overview**
- **Introductory Approach – NACo Weeklies**
- **Planned Approach – Microsoft Learn for Organizations**
 - **Plans**
 - **Collections**
 - **Challenges**

Introductory Approach

Purpose:

- Provides county employees with access to a curated selection of the 4,000 online learning resources available in the Microsoft Learning Catalog
- Empower local government employees with the knowledge and skills to implement responsible AI and GenAI in their lives
- Identify and provide targeted training courses for individuals to improve their cybersecurity skills

Courses to Take:

- Cover General digital trainings, IT specific as well as business analysis
- Topics such as AI, cyber security, privacy, project management

General Course Example:

Embrace responsible AI principles and practices (9 units - 51 minutes) – This course offers an overview of the principles, governance system, and procedures followed at Microsoft and can be used to inform your AI strategy

IT Skills Course Example:

Get started with Microsoft 365 Copilot - Training (3 modules with 8, 9 and 7 units each – 1 hr. 25 minutes total) – these modules explore Microsoft 365 Copilot, and offer insights into its functionality and Microsoft's dedication to implementing AI responsibly and ethically

Business Analyst Course Example:

- **Discover data analysis - Training (6 units - 36 minutes)** –
Want to introduce someone in your county to data analysis? It may be someone on the IT team or someone in another department

Drive success by boosting your
team's technical skills

PLAN

AI in the Public Sector (1)

1 milestone

Artificial Intelligence (AI) is changing the game for businesses and organizations of all types. New advanced natural language processing capabilities around generative AI and large language models have captured the world's imagination. These capabilities have the potential to revolutionize both the way governments interact with citizens and how the public workforce addresses society's challenges. Explore this Worldwide Learning Collection and start imagining how AI can help your public sector organization.

 Groups

A learning group is a name that allows you to identify a group of learners in your progress report; learners will not see this name.

Creating a learning group generates a unique link to your plan for the specific group of learners.

Group name: NACoTest

 Copy invite link  Email

 New learning group

Celebrate your learning achievement

Rita Reynolds,

Well done! You've completed the [AI in the Public Sector \(1\) plan](#) on Microsoft Learn.

You've achieved the following learning outcomes:

- Upon completion of this plan, learners will be able to understand how AI can improve Public Sector Service Delivery.
- Upon completion of this plan, learners will be able to apply AI
- Upon completion of this plan, learners will be able to share with others

Celebrate by [sharing your achievement](#).

Next Steps

- **If a county creates their own Plans, then let NACo know**
- **NACo will create several plans and send out on Tech Xchange**
 - It does require those taking the course to create a Microsoft Account
 - This will allow NACo to track the number of users that take the accounts over until the end of June
- **Goal: Is to provide online learning to county staff as part of the NACo Tech Priority of Talent, but not limited to IT** [2025TechPriorities.pdf](#)

IT Talent Acquisition, Retention and Future of Work:

Implement strategies for retaining talent through competitive compensation, continuous leadership and staff development while fostering an engaging culture.

Closing Remarks
